

# Community Action on Climate Change

for the

**GLOBAL CLIMATE ACTION DAY**

**BTHELLS BEACH**

**1pm SUNDAY SEPTEMBER 21st**

September 21st 2014 is the day the world's people tell our leaders that we demand urgent action on the causes of climate change.

At Bethells Beach we will make a **MASSIVE GREEN HEART WITH PEOPLE** on the beach to be photographed from the air.

Be on the beach at 1pm. Bring a green towel (or anything green to hold above your head). Dress in green if you can. Please car pool and bring the whole family.

This is a **NON PARTISAN** event. Let's tell the new government that we want a multi-party blue print for a move away from fossil fuels and "greenhouse gases" to ensure our grand children have a sustainable future.

This action will be one of the first of thousands of climate actions all over the world. We will share the images with the rest of the Avaaz/global community (39 million members world wide), and NZ and global media. The global action will culminate in a massive march in New York City. Let's show the world where we stand. Kia kaha.

For more info please see our facebook page:

**NOTE!** This is a weather dependant event.  
Please check the facebook page the day before if the weather is doubtful.
