

Piha Dune Network Weed and Animal Pest Management

Council is investigating the requirements for weed and animal pest control in local parks situated along the dune network of Piha. Currently weed management plans are available for Les Waygood Park and North Piha Strand. Council is now seeking plans for North Piha Esplanade, Piha Esplanade Reserve and Piha Domain dunes and South Piha Road Reserve and adjoining dunes. This will provide a staged work programme for Council staff to work in conjunction with Regional Parks, Piha Beachcare and other interested parties to manage the dune network.

It is expected that minor weed control will begin in September 2012 in Les Waygood Park and Piha North Strand.
